PPF PROCESS

GENTECH GUARD®

PPF INSTALLATION PROCESS

STEP BY STEP

1 STEP 1: Vehicle Inspection

The vehicle is thoroughly inspected before installation to identify:

- ✓ Existing scratches or dents
- ✓ Paint condition
- ✓ Panel alignment

2 DEEP CLEANING & DECONTAMINATION

The car undergoes a detailed wash and surface preparation:

- ✓ Foam wash & rinse
- ✓ Iron and tar removal
- ✓ Clay bar treatment

3 STEP 2: Surface Preparation

Vehicle panels are wiped with a special prep solution

- ✓ Any moisture or residue is removed
- ✓ Surface is made completely smooth

4 PPF CUTTING & ALIGNMENT

Pre-cut patterns or bulk film cutting is done

- ✓ Film is carefully aligned to each panel
- ✓ Edges and curves are matched precisely

5 STEP 5: Film Application

A slip solution is applied to position the film

- ✓ Film is gently laid onto the panel
- ✓ Squeegee is used to remove water and air

6 STEP 5: Film Application & Finishing

Proper preparation critical for long lasting performance

- ✓ Edges are wrapped for seamless protection
- ✓ Heat is applied where required

7 STEP 7: Final Inspection

WHY PROFESSIONAL INSTALLATION MATTERS

- ✓ Perfect finish
- ✓ Long-term durability
- ✓ Warranty eligibility
- ✓ Zero paint damage
- ✓ Quality check ensures professional installation
